BISOLVON INJECTION

Composition
Each ml contains:
Bromhexine hydrochloride, in an aqueous solution 3 mg

Characteristics
Bromhexine is a mucolytic expectorant, which increases bronchial secretion and permeability of the bronchial wall. Stimulates gamma globulin in the mucous membranes and therefore increases immunity. Increases the concentration of antibiotics in bronchial secretions when used simultaneously.

Indications
Respiratory disorders accompanied by an increased production of viscous mucus, in calves, pigs, dogs and cats.

Dosage and administration
1 ml per 6 kg body weight i.m.
Continue treatment with Bisolvon powder, twice-daily 1 g per 40 kg body weight, p.o. during 5 days.

Withholding period
The Netherlands: Calves 3 days
Pigs 2 days

Storage
Store at 15 – 25°C.
Opened bottle can be used for 28 days (stored at 15 – 25°C).
Keep out of reach and sight of children.

Presentation
100 ml bottle

Registration (International)
