

METABOLASE 500ML

Composition

Each ml contains:

L-Carnitine hydrochloride	6.133 mg (equivalent to L-Carnitine 5mg)
Lipoic Acid	0.2 mg
Pyridoxine hydrochloride	0.15 mg
Cyanocobalamin (B12)	0.03 mg
D,L-Acetylmethionine	20 mg
L-Arginine	2.4 mg
L-Ornithine hydrochloride	1.532 mg (equivalent to L-Ornithine 1.2mg)
L-Citrulline	1.2 mg
L-Lysine hydrochloride	0.625 mg (equivalent to L-Lysine 0.5 mg)
Glycine	1.5 mg
Taurine	1.5 mg
Aspartic Acid	1.5 mg
Glutamic acid	1.5 mg
Fructose	50 mg
Sorbitol	80 mg

Excipients q.s. to 1 ml

Characteristics

Metabolase only contains substances which are naturally present in the organism and can even be administered on the day of a race with no risk of being positive to anti-doping controls.

Metabolase contains among others L-Carnitine which enhances fatty acid oxidation and ATP production in the muscle.

Metabolase is a metabolic, detoxifying, antioxidant and tonic preparation for veterinary use.

Indications

Metabolase is indicated in horses to enhance performance, reduce muscle fatigue and improve recovery after hard work and in animals suffering toxic and metabolic disorders and reduced hepatic functionality.

Intense exercise, acid-base disorders, convalescence, postoperative course, tying-up syndrome, hepatopathy, intoxications.

Dosage and administration

Horses 250-500ml by intravenous, subcutaneous or intraperitoneal route

Foals 250 ml by intravenous, subcutaneous or intraperitoneal route

Storage

Store at room temperature, away from light and heat sources.

Keep out of reach and sight of children.

Presentation

Vial á 500ml.

Registration (International)

A.I.C n. 101750014
