Adverse reactions

Treatment with a homeopathic medicinal product may temporarily lead to a worsening of prevalent symptoms (initial deterioration). In these cases, please discontinue treatment with the medicinal product and consult your veterinary surgeon.

Also: See leaflet.

Precautions

Immediately consult a veterinary surgeon if there are persistent, unclear, periodic or recurring complaints, fever or severe disturbances of general well-being. Only veterinary surgeons or persons with a good command of injection techniques should inject this medicinal product. Improperly administered injections may cause permanent damage and even induce life-threatening conditions. For subcutaneous application. Observe the animal for an appropriate period following injection. Notify your veterinary surgeon if you see signs of an anaphylactic response. Only use Arnica-logoplex® with due care on animals with hypersensitive reactions to composite plants.

Contraindications

Due to the Echinacea content, please administer Arnica-logoplex® with care if the systemic disease symptoms worsen. These include, among others; Chronic viral infections such as leucosis or FIV, autoimmune diseases such as rheumatism or lupus erythematosus, diabetes mellitus.

Warnings

Homeopathic medicinal products are no different from other medicinal products in that combined use may prompt interactions. Please consult your veterinary surgeon if you intend to use Arnica-logoplex® concomitantly with another medicinal product.

Storage

Store at 15 – 25°C. Keep away from children.

Presentation

Bottle à 100ml (1x or 5x)
