

# TENDILAX ANTIPHLOGISTIC

## WARM POULTICE

### Description

High-level horses are affected by muscle and tendon pain following intense exercise. This can be reduced by applying specific local treatments.

### Purpose

TENDILAX ANTIPHLOGISTIC is for external use only, designed to be applied locally to the limbs of sport horses.

### Formula

TENDILAX ANTIPHLOGISTIC is a warm poultice containing kaolin, a very fine white clay.

### Instructions for use

Heat the paste in the microwave or a water bath, then mix the paste carefully and test the temperature. Apply generously to affected areas. Cover with paper or plastic wrap and hold in place with a cohesive bandage. Apply twice per day for 3 to 8 days.

Store the pot under 25°C.

Non-doping formula.

### Professional format

2 kg pot - (EAN 3515650720729).

LOCAL ARTICULAR SUPPORT
